#### SUPPLEMENTARY INFORMATION:

##### I. Background

FDA is announcing the availability of a draft GIF #239 entitled “Human Food By-Products for Use as Animal Food.” This draft guidance is intended for domestic and foreign facilities that are required to register as food facilities under the FD&C Act because they manufacture, process, pack, or hold human food for consumption in the United States, which results in by-products for use as animal food.

This draft guidance contains information for these facilities to determine what requirements to follow for their human food by-products for use as animal food and provides examples and recommendations for how they might meet those requirements. The requirements

were established in the Current Good Manufacturing Practice, Hazard Analysis, and Risk-Based Preventive Controls for Food for Animals final rule published on September 17, 2015 (80 FR 56170). The requirements are codified in 21 CFR parts 117 and 507.

## II. Significance of Guidance

This level 1 draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on human food by-products for use as animal food. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

## III. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). The collections of information in 21 CFR part 507 have been approved under OMB control number 0910-0789.
